Iteration Report IV & V

Introduction

As Simple Labs, we completed all tasks which belong to these iterations. The detailed information about this iteration and tasks are given below.

Task 1: Filter

Implementations of all filters are completed.

Task 2: Tests

Testing of the project is completed and report is prepared and sent via COW.

Task 3: Installer & Uninstaller

Installer and uninstaller of the project is prepared.

Task 4: Web & Presentation

Web page is updated and presentation is prepared and presented in demo day and final presentation.

Conclusion

As of the end of the semestre and all iterations, we have designed and implemented all the tasks successfully with cooperation of our asisstants and instructors. Finally, we can say that we learned a lot of details about being an computer engineer. Thank you for yourguidance and help.
